

MULTI-BLADE DAMPER HARDWARE

Hardcast Hardware

PARA-LINK & OPPO-LINK

For many years, various damper hardware producers have copied the original Honeywell multi-blade damper hardware designs with some interesting, but often questionable innovations. The basic dimensions and concept have remained unchanged.

Years of experience in designing and manufacturing this hardware has led Hardcast engineers to a simple, progressive approach. Opposed-action dampers have traditionally required a special high and low bracket. This is no longer necessary; only two brackets are needed for all normal dampers. Also, Hardcast's compression ring/locknut clamp replaces set screws, while steel parts are zinc-plated to industry specifications.

- Most Dependable Clamping System Available**
- Infinite Adjustments of Connecting Rods
 - No Deformation of Rod Face from Set Screws
 - Readjustment after Installation Simplified
 - Rods are Placed in 'Double-Shear'

OPPO-LINK Set

Part #	Product Description	Qty
307939	OPPO-LINK SET 1/4" 8" ROD (OLS-14)	100/Case
